

## PANEL FILTERS

**Type:** panel type pre-filter.

**Applications:** pre-filtration for ventilation and air conditioning systems:

- office buildings,
- hotels,
- shopping centers and other public buildings,
- living houses,
- sports centers,
- industrial and storage facilities.

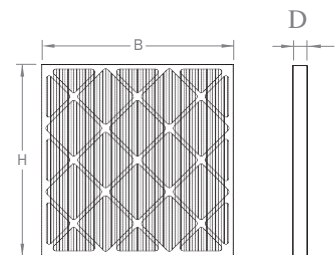

Panel filter cleans the air from coarse particles – sand, dust, blossoms, leaves, bugs. Filter frame has protective diagonals for filter rigidity.

**Frame:** water resistant cardboard.

**Filter media:** high-quality polyester

**Hermetic material:** polyester.

**Maximum permitted temperature/relative humidity:** 70°C/100%.

Also we can produce custom-sized filters.
