

PRE-FILTERS

Type: bag type pre-filter

Application: ventilation and air conditioning systems:

- office buildings,
- hotels,
- shopping centers, other public buildings,
- sports arenas,
- industrial facilities and warehouses.

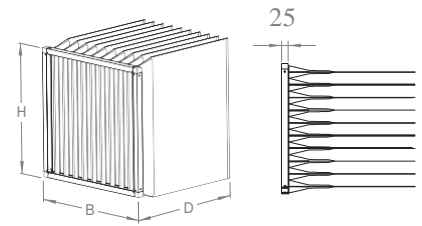

Bag pre-filters hold the coarse dust from the air such as sand, blossoms, leaves and insects. Pre-filter can be used as a main filter for the indoor environments with low air quality requirements such as warehouses.

Frame: galvanized steel (25 mm) or sturdy plastic (20, 25 mm)

Filter media: high-quality polyester.

Maximum permitted temperature/relative humidity: 70°C/100%.

Also we can produce custom-sized filters.

| Width (B), mm | Height (H), mm | Depth (D), mm | Pockets qty | Filter class EN779 | Filter class ISO 16890 |
